

Carlos Ramos

Senior Software Engineer & Team Leader

 carakan@gmail.com |  carakan.net |  [linkedin.com](https://www.linkedin.com) |  github.com

SUMMARY

Senior Software Engineer and Team Leader designing and shipping reliable products for international clients. Hands-on with **AI-assisted development**: orchestrating AI agents with opinionated harnesses for engineering workflows, local LLMs for privacy-sensitive work, and AI-assisted automation of production support. Deep experience across object-oriented, functional, and event-driven systems, DDD-based design, real-time features, and modernizing legacy codebases into scalable platforms.

WORK EXPERIENCE

Kopius, Inc. — Senior Ruby/Node.js Support Engineer Mar 2024 – Present

- Maintenance of a complex legacy system; ticket management: logging, tracking, and prioritizing requests using ticketing tools and **AI-driven automation**.
- Overseeing the decommissioning of the legacy system, which serves over **100,000 active paying users**, while ensuring **business continuity**.

Skills: Ruby, Bun, TypeScript, opencode, Jira Automation, AI Agents, PostgreSQL

Kopius, Inc. — Senior Ruby Backend Developer May 2022 – Dec 2023

- Legacy multi-tenant ERP/CRM system for large-scale organizational use.
- Analyzed and optimized slow requests in the legacy application, debloated production/test server memory consumption, and improved report generation and storage — saving approximately **\$50K USD in annual AWS costs**.
- Owned the new mobile backend API with real-time messaging and in-app/native mobile calls (React Native/Expo integration), delivering a solid mobile app to 1K+ users.
- Provided engineering support and internal tooling for production systems.

Skills: Twilio, Amazon S3, Financial Reporting, Elasticsearch, Ruby, RSpec, Sidekiq, WebRTC, PostgreSQL, Travis CI

EMR-Bear, LLC — Senior Software Developer May 2020 – May 2022

- In-house legacy Electronic Medical Record (EMR) system transitioning to SaaS.
- Delivered a **telehealth video call feature** during the COVID-19 pandemic, helping thousands of people access remote care.
- Added features to legacy code, set up CI/CD, raised test coverage from **0% to 50%**, and improved application security.

Skills: Ruby on Rails, Amazon S3, RSpec, MariaDB, jQuery, React.js, Docker, WebRTC, Twilio, GitHub Actions

Zenlabs — CTO / Senior Developer / Freelancer Sept 2007 – Present

- Led all engineering aspects — strategy, architecture, and delivery — for small and medium-sized Latin American startups as CTO, Team Leader, and Senior Developer. One startup received a **\$50K seed round** in a startup accelerator.
- Built and led teams of developers delivering high-quality software across multiple concurrent client projects.

Skills: Ruby on Rails, MySQL, PostgreSQL, RSpec, Capybara, WebSockets, Pusher.io, JSON, Mobile, AWS

Expedition.ws — Full-Stack DeveloperDec 2016 – Dec 2018

- Social network for travelers focused on streaming interactions: chat, geolocation, video, recommendations, and virtual tours.
- Developed APIs in **Elixir/Phoenix with OTP**, real-time WebSocket features, geolocation, and multimedia processing; integrated with Ember.js and shipped a Progressive Web App (PWA) with web workers.

Skills: Elixir, Phoenix, OTP, Ember.js, PostgreSQL, WebSockets, Mobile, TDD

Mojix — Senior DeveloperMay 2015 – Feb 2016

- PINC YMS: extensive legacy warehouse management system with IoT features for asset tracking.
- Transitioned asset monitoring from static polling to a real-time, **Event Sourcing**-centric architecture for **50K connected assets**.
- Designed and implemented API interoperability as microservices.
- Improved performance of reports and dashboards, strengthened the test suite, and set up CI/CD.

Skills: Ruby on Rails, PostgreSQL, Redis, RSpec, CircleCI, Amazon S3, Amazon SQS

TeraCode — Software DeveloperSept 2009 – May 2010

- Blueleaf: outsourced team building the first production release of a fast-growing fintech startup.
- Delivered features with RSpec/TDD and integrated third-party services using JSON, XML-RPC, and SOAP.

Skills: Ruby on Rails, Haml, RSpec, MySQL

EDUCATION

2007 – 2012 Bachelor of Computer Science at **Universidad Mayor de San Andrés**

SKILLS

AI	AI Agents, Agent Orchestration, Opinionated Harnesses, Local LLMs, Prompt Engineering, Production Support Automation, AI-Assisted Development
Backend	Ruby, Ruby on Rails, Elixir, Phoenix, OTP, Microservices, REST APIs
Frontend	React.js, Ember.js, TypeScript, Progressive Web Apps (PWA)
Data & Infra	PostgreSQL, MySQL, Redis, Elasticsearch, RabbitMQ, Amazon Web Services (AWS), Docker, CI/CD (GitHub Actions, CircleCI, Travis CI)
Real-Time	WebSockets, WebRTC, Event Sourcing, Twilio, Sidekiq
Practices	Domain-Driven Design (DDD), Test-Driven Development (TDD), RSpec, Capybara, Telehealth, IoT
Leadership	Team Leadership, Mentoring, Project Ownership, Async Remote Collaboration

LANGUAGES

Spanish (Native) | English (Full Professional Proficiency)
